

# APSys 2026

17th ACM SIGOPS Asia-Pacific Workshop on Systems

<https://apsys26.github.io/>

September 17-18, 2026 - Bangkok, Thailand

## Sponsorship Opportunities

**APSys** is a leading forum for systems research in the Asia-Pacific region. It brings together researchers and practitioners working across operating systems, distributed systems, networking, storage, cloud computing, data centers, systems for AI and ML, and related areas. APSys is a compact, highly interactive workshop that creates strong opportunities for technical exchange and community building.

**Why sponsor?** Sponsoring APSys provides branding and name recognition with an international community of systems researchers, faculty, students, and industry practitioners. Sponsorship also helps grow the workshop community, supports student participation, and strengthens the pipeline of future systems researchers and engineers.

**Fund uses:** Sponsorships allow us to provide economic support for students through registration, travel, and lodging assistance. They also help keep registration fees affordable and support workshop activities that create opportunities for networking and collaboration between academia and industry.

Sponsorship level	Diamond	Platinum	Gold	Silver
<b>Donation</b>	<b>\$10,000</b>	<b>\$7,500</b>	<b>\$5,000</b>	<b>\$2,500</b>
